

Forestry England

Become a miniature

# Landscape gardener

## Did you know?

We're the nation's largest land manager. We look after more land and more trees than any other organisation in the country.

Over the last century, woodland cover has doubled in England and **we have planted over one billion trees**. We are committed to growing the nation's forests by creating new woodlands.

**You too can have a go at designing a miniature landscape of your own!**

### Step 1

Fill a tray or plate with soil and press down gently.

### Step 2

Add small stones, moss, or even a pond (we used a small mirror but you could use a jam jar lid and fill it with water).

### Step 3

Add small plants and flowers from your garden to make trees (ask an adult to make sure they're safe to use). We also used some toy trees.
