Dear Parent/Guardian,

There has recently been a small number of confirmed measles cases in the Bradford area. Measles spreads easily and in rare cases can lead to serious illness including ear infections, pneumonia, and inflammation of the brain which require hospitalisation. On very rare occasions infection can lead to long term disability or death.

The best way to protect your child is to get them vaccinated. The MMR vaccine is safe and effective. It offers lifelong protection against measles as well as mumps and rubella. It is never too late to vaccinate your child because measles may have serious complications regardless of their age. More information about the MMR vaccine can be found here:

www.nhs.uk/conditions/vaccinations/mmr-vaccine/
(or by scanning the below QR code with your mobile phone's camera)

By offering the MMR vaccine to children who have not previously received two doses of the vaccine we are helping to prevent further cases in Bradford. The NHS are offering free vaccination.

For further information or to book an appointment, contact the school immunisation team on **01274 221269**. The team will be happy to take a telephone consent and answer any queries.

It is also important to be aware of the symptoms of measles. These can include:

- high fever
- sore, red, watery eyes

Trust Chair: Dr Linda Patterson
Chief Executive: Therese Patten

- coughing
- aching and feeling generally unwell
- a blotchy red brown rash, which usually appears after the initial symptoms.

More information about measles is on the NHS website here:
<https://www.nhs.uk/conditions/measles/>

Anyone with symptoms that could be measles should stay at home and phone their GP or NHS 111 for advice. Please do not visit the surgery or A&E as measles spreads very quickly and easily and so it is important to try and prevent the illness spreading further.

People with symptoms should also especially try to stay away from areas where you could come into contact with vulnerable people such as schools, nurseries, or care homes.

Yours sincerely,

The School Immunisation Team
